Subject: Request for CSR Funding Support – “Rural Health Awareness Initiative”

Dear CSR Manager,

I hope this message finds you well.

I am *Navya Pasunuri*, representing *Helping Hands Foundation*, a non-profit organization working towards improving healthcare access and awareness in rural communities across Telangana.

We are currently implementing a project titled “**Rural Health Awareness Initiative**”, aimed at conducting medical camps, distributing hygiene kits, and providing health education to underprivileged families. This initiative directly supports **UN SDG Goal 3: Good Health and Well-being**, aligning with your organization’s CSR focus on community health improvement.

We are seeking CSR funding support to expand this program to 20 additional villages, benefiting nearly 5,000 residents. A detailed project proposal with the budget and implementation plan is attached for your kind review.

We would be grateful for an opportunity to discuss this initiative in more detail at your convenience. Thank you very much for considering our request and for your continued commitment to social welfare.

Warm regards,

Navya Pasunuri

Perfect Here’s a **complete example of a Project Proposal** — following exactly the **structure and guidelines** I gave earlier.

Let’s take a realistic and relevant example:

Project Proposal

Project Title: *Digital Education for Underprivileged Children*

Submitted by: Navya Pasunuri

Organization: Bright Future Foundation

Date of Submission: 10 November 2025

1. Executive Summary / Abstract

This project proposal outlines the plan for implementing **Digital Education for Underprivileged Children** in rural areas of Telangana. The project aims to provide access to quality education through digital learning tools, interactive e-content, and trained volunteer educators.

The initiative will bridge the digital divide by setting up community learning centers equipped with tablets and internet access. The expected outcome is improved literacy, digital skills, and school retention rates among 500 rural students. The project is estimated to cost ₹8,00,000 and will be completed within six months.

2. Introduction / Background

Education is the foundation of national progress, yet thousands of children in rural India lack access to proper learning resources due to poor infrastructure, lack of teachers, and digital exclusion. According to the Annual Status of Education Report (ASER 2023), nearly 35% of rural students in India lack basic reading and digital literacy skills.

The Bright Future Foundation, working since 2018, has successfully executed several education and health-based community programs. Building on our past experience, we propose a new initiative focusing on **digital education** to enhance learning opportunities for underprivileged students.

3. Problem Statement / Need Statement

The COVID-19 pandemic exposed the **digital learning gap** between urban and rural students. Many children in rural Telangana villages could not continue their studies due to lack of devices, internet, and digital awareness.

Without immediate intervention, these children risk dropping out permanently, limiting their future opportunities.

Hence, there is an urgent need for **affordable, community-based digital education centers** that ensure equitable access to technology and learning.

4. Objectives of the Project

General Objective:

To enhance access to quality digital education for underprivileged children in rural Telangana.

Specific Objectives:

1. Establish 5 digital learning centers equipped with tablets and e-learning software.
2. Provide digital literacy training for 500 children aged 6–14.
3. Train 20 volunteer educators in digital teaching methods.

4. Improve academic performance and digital awareness by at least 40% within 6 months.
-

5. Project Scope and Limitations

Scope:

- Installation of hardware (tablets, Wi-Fi routers) in community learning centers.
- Development of customized digital learning content.
- Training sessions for teachers and volunteers.
- Monitoring progress through regular assessments.

Limitations:

- Limited coverage to 5 villages in Phase I.
 - Internet connectivity may pose challenges in remote locations.
 - Dependence on local volunteer availability.
-

6. Methodology / Approach

The project will be implemented in four phases:

Phase	Activities	Duration
Phase 1: Planning	Site selection, stakeholder meetings, procurement of materials	2 weeks
Phase 2: Setup	Installation of digital labs, content loading, internet setup	3 weeks
Phase 3: Training	Conduct training for volunteers and teachers	2 weeks
Phase 4: Implementation & Evaluation	Launch learning sessions and monitor progress	4 months

Tools and Technologies:

- Tablets, Smart TVs, Wi-Fi connectivity
- E-learning platforms (BYJU's, Diksha, Khan Academy)
- Assessment tools like Google Forms and quizzes

Team Roles:

- Project Coordinator – Overall supervision
 - IT Technician – Installation and maintenance
 - Trainers – Conduct sessions
 - Volunteers – Student engagement and feedback collection
-

7. Work Plan / Timeline

Activity	Duration	Responsible Person
Requirement Analysis	2 weeks	Project Coordinator
Procurement of Equipment	1 week	Purchase Officer
Setup of Digital Labs	2 weeks	IT Technician
Volunteer Training	2 weeks	Training Lead
Implementation of Classes	3 months	Volunteer Educators
Evaluation and Reporting	2 weeks	Monitoring Team
Total Project Duration: 6 months		

8. Budget / Cost Estimation

Expense Item	Estimated Cost (₹)
Tablets and Accessories (50 units)	2,50,000
Internet and Wi-Fi Setup	75,000
Learning Software Licenses	1,00,000
Volunteer Training & Workshops	50,000
Transport & Logistics	75,000
Monitoring & Evaluation	50,000
Miscellaneous (admin, printing, etc.)	1,00,000
Total Estimated Cost	₹8,00,000

9. Expected Outcomes / Deliverables

- 5 functional digital learning centers established.
 - 500 children gain access to regular e-learning sessions.
 - 20 trained volunteer educators capable of delivering digital lessons.
 - 40% improvement in digital literacy and academic performance (measured through pre- and post-tests).
 - Detailed completion and impact report submitted to funders.
-

10. Impact / Benefits

Social Impact: Enhanced educational access for rural children and reduction in dropout rates.

Economic Impact: Increased employability through early digital skill exposure.

Educational Impact: Strengthened digital literacy and improved learning outcomes aligned with NEP 2020 goals.

11. Risk Analysis / Challenges

Potential Risk	Mitigation Strategy
Internet connectivity issues	Use offline e-learning modules
Low volunteer turnout	Partner with local colleges for internship-based volunteering
Equipment damage	Regular maintenance and protective storage
Budget shortfall	Seek additional CSR partners or government support

Conclusion

The *Digital Education for Underprivileged Children* project aims to create a sustainable model for inclusive education by leveraging technology. By bridging the digital gap, we can empower children to dream beyond barriers.

We sincerely request your support and partnership to make this vision a reality. Together, we can transform education and empower the next generation.

13. References / Bibliography

1. ASER Report 2023, Pratham Foundation
 2. Ministry of Education, Government of India – Digital India Initiative Reports
 3. UNESCO Report on Digital Learning (2022)
-

14. Appendix

- Gantt Chart of Project Timeline
 - Letters of Support from Local Schools
 - Organizational Registration and CSR Compliance Documents
 - Photographs of Previous Community Projects
-

Key Takeaways:

- Structured, clear, and professional.
- Includes all 15 required sections.
- Suitable for submission to CSR funders, academic supervisors, or NGOs.
